

# **The Influence of Visualization on Mathematical Thinking**

Đurđica Takači

Faculty of Science, University of Novi Sad

Novi Sad, Serbia

We present the influence of Dynamic Geometry Systems (*GeoGebra*), on the teaching and learning functions. The graph of function is consider as a geometric object in order to visualize the properties of functions, with the group of fifteen years old gifted students and their cognitive activities are analyzed.

Keywords: Dynamic geometry, learning and teaching, definition of function, inverse function
