|--|-----|
| In Memoriam: Janez Ušan | 1 |
| D. A. Romano: A note on the quasi-antiorder in a semigroup..... | 3 |
| D. Breaz: An integral univalent operator of the class $S(p)$ and T_2 | 9 |
| H. Orhan: On neighborhoods of analytic functions defined by using Hadamard product..... | 17 |
| M. Joița: A note about full Hilbert modules over Fréchet locally C^* -algebras..... | 27 |
| X. Ge, J. Shen, G. Ying: Spaces with σ -weakly hereditarily closure-preserving sn -networks..... | 33 |
| Ö. Öcalan, Ö. Akin: Oscillation Properties for Advanced Difference Equations..... | 39 |
| I. Chajda: Algebras with restricted cardinalities of congruence classes..... | 49 |
| K. Ilarslan, E. Nešović: On rectifying curves as centrodes and extremal curves in the Minkowski 3-space..... | 53 |
| R. Almeida: Compact linear operators, a survey..... | 65 |
| M. Mirković, D. Surla: XML schema of entry form for students..... | 75 |
| M. S. N. Murty, G. S. Kumar: Extension of Liapunov theory to five-point boundary value problems for third order differential equations..... | 85 |
| M. Neagu: From first order pde-systems to harmonic maps between generalized Lagrange spaces..... | 93 |
| E. Aichinger, D. Mašulović, R. Pöschel: Complexity of Mal'cev interpolation..... | 107 |
| B. Milosavljević, B. Dimić: XML schema of UNIMARC format variant and bibliographic record in BISIS software system..... | 115 |
| D. Seleši: Hilbert Space Valued Generalized Random Processes – Part I..... | 129 |
| D. Tešendić: A database model for library material usage..... | 155 |
| M. Stojaković, Z. Stojaković: Integral with respect to fuzzy measure in finite dimensional Banach spaces..... | 163 |
