

Contents

M. Döldül, S. Yüce, N. Kuruoğlu: The polar moment of inertia of the enveloping curve.....	1
A. Rychlewicz: On almost nearly continuity with reference to multifunctions in bitopological spaces	5
M. Khare, S. Gupta: Extension of nonadditive measures on locally complete σ -continuous lattices.....	15
K. Paul: Antieigenvectors of the generalized eigenvalue problem and an operator inequality complementary to Schwarz's inequality	25
O. Demirel, E. Soytürk: The hyperbolic Carnot theorem in the Poincaré disc model of hyperbolic geometry	33
A. C. Gavriluț: Regularity of multisubmeasures with respect to the Wijsman topology	41
E. Ekici, S. Jafari, M. Caldas, T. Noiri: Weakly λ -continuous functions	47
R. Almeida: A mean value theorem for internal functions and an estimation for the differential mean point	57
E. Ekici, T. Noiri: Connectedness in ideal topological spaces	65
A. Tekcan, A. Özkoç, B. Gezer, O. Bizim: Elliptic curves, conics and cubic congruences associated with indefinite binary quadratic forms ...	71
R. Ebrahimi Atani, S. Ebrahimi Atani: A note on uniformly primary submodules.....	83
V. Marenitch: Geodesic lines in $\widetilde{SL}_2(R)$ and <i>Sol</i>	91
D. Mekerov, M. Manev: On $4n$ -dimensional lie groups as quasi-Kähler manifolds with Killing Norden metric	105
U. C. De, A. K. Gazi: On nearly quasi Einstein manifolds	115
I. Botički, I. Budiščak, N. Hoić-Božić: Module for online assessment in AHyCo learning management system	123
M. Budinčević, V. Marić: A remark on regular Sturm-Liouville system	141
M. A. Khan, Sumitra: A common fixed-point theorem in 2 non-Archimedean menger pm-space for r-weakly commuting maps of type (P)	145
M. Ivanović, I. Pribela, B. Vesin, Z. Budimac: Multifunctional environment for e-learning purposes	153
I. Čomić: The subspaces of Hamilton spaces of higher order	171
Dj. Herceg, D. Herceg: A method for obtaining third-order iterative formulas	191
