

Contents

D. Mosić: Estimation of a condition number related to the weighted Drazin inverse	1
D. Turkoglu, S. Sedghi, N. Shobe: A common fixed point theorem in complete fuzzy metric spaces	11
H. Doostie, K. Ahmadidelir: A class of Z-metacyclic groups involving the Lucas numbers	21
C. K. Li: Several products of distributions on manifolds	31
G. Murugusundaramoorthy, S. Sivasubramanian, R. K. Raina: On a subclass of uniformly convex functions involving Cho-Srivastava operator ..	47
M. Zulfıqar: A note on the intersection of a radical class with the sum of radical classes of hemirings	57
M. Zulfıqar: A note on radicals of seminear-rings	65
T. Bînzar: On some convergences for nets of functions with values in generalized uniform spaces	69
M. Alamgir Khan, Sumitra: A common fixed point theorem in non- Archimedean Menger PM-space	81
A. Aliouche, V. Popa: General common fixed point theorems for occasionally weakly compatible hybrid mappings and applications	89
Đ. Herceg, Ž. Marčičević: A lightweight conference management system on ASP.NET	111
M. S. Petković: On optimal multipoint methods for solving nonlinear equations	123
