

## Contents

<b>B.V. Senthil Kumar, J.M. Rassias, K. Ravi:</b> Ulam stability of a bi-reciprocal functional equation in quasi- $\beta$ -normed spaces .....	<b>1–11</b>
<b>Murugesan Shakthiganesan, Ramachandran Vembu:</b> On the product of smooth fuzzy topological spaces .....	<b>13–31</b>
<b>Pulak Sahoo, Gurudas Biswas:</b> Value distribution and uniqueness of $q$ -shift difference polynomials .....	<b>33–44</b>
<b>S. Etemad, Sh. Rezapour:</b> On a two-variables fractional partial differential inclusion via Riemann-Liouville derivative .....	<b>45–53</b>
<b>Marijana Greblički:</b> A class of some third-metacyclic 2-groups .....	<b>55–64</b>
<b>Tijana Levajković, Hermann Mena, Martin Zarfl:</b> Lévy processes, subordinators and crime modelling .....	<b>65–86</b>
<b>Dennis Nemzer:</b> Quasi-asymptotic behavior of Boehmians .....	<b>87–102</b>
<b>Rajendra Prasad, Abdul Haseeb:</b> On a Lorentzian para-Sasakian manifold with respect to the quarter-symmetric metric connection .....	<b>103–116</b>
<b>Saidani Mansouria, Benharrat Belaïdi:</b> On the fast growth of solutions to higher order linear differential equations with entire coefficients .....	<b>117–133</b>
<b>Maximilian F. Hasler:</b> Bloch-periodic generalized functions .....	<b>135–143</b>
<b>S. Etemad, Sh. Rezapour:</b> On a system of hyperbolic partial fractional differential inclusions	
<b>145–161</b>	
<b>Victor Dévoué, Jean-André Marti, Hans Vernaeve, Jasson Vindas:</b> Generalized functions on the closure of an open set. Application to uniqueness of some characteristic Cauchy problem .....	<b>163–180</b>
<b>Khaled Benmeriem, Fatima Zohra Korbaa:</b> Generalized Roumieu ultradistributions and their microlocal analysis .....	<b>181–200</b>
