

Contents

R. A. R. Monzo:

Groupoids determined by involutive automorphisms
on semilattices of groups.....1–19

Oluwatosin Temitope Mewomo, Ferdinard Udochukwu Ogbuisi and Chibueze Christian Okeke:

On split equality minimization and fixed point problems 21–39

Ahmet Hamdi Avsar, Yunus Emre Yildirim:

On the trigonometric approximation of functions
in weighted Lorentz spaces using Cesáro submethod 41–55

Adara M. Blaga, Cristina E. Hreţcanu:

Invariant, anti-invariant
and slant submanifolds of a metallic manifold 57–82

Chawngthu Lalmalsawma, Jay Prakash Singh:

On almost pseudo m-projectively symmetric manifolds 83–97

Gopal Datt, Anshika Mittal:

Operators induced by weighted Toeplitz
and weighted Hankel operators 99–111

Marko Kostić, Daniel Velinov:

Vector-valued almost automorphic distributions
and vector-valued almost automorphic ultradistributions 113–123

Selin Aydinoglu, Bülent Nafi Örnek:

Applications of the Jack's lemma for the holomorphic functions 125–139

Thái Anh Nhan, Relja Vulcanović:

A note on a generalized Shishkin-type mesh.....141–150
