

Time	September 5th (room 62)	September 6th (room 65)	September 7th (room 65)
09.00-09.45	Registration		
09.45-10.00	Welcome words		
	Morning session	Morning session	Morning session
10.00-10.55	<b>S. D. Friedman</b> A real that kills the GCH everywhere	<b>J. Bagaria</b> Topologies on ordinals and stationary reflection	<b>I. Juhász</b> Resolvability
11.00-11.30	Coffee break		
11.30-12.25	<b>N. Dobrinen</b> Tukey types of ultrafilters	<b>J. López-Abad</b> Finite families of finite sets and the Banach-Saks property	<b>M. Džamonja</b> Universality problems in the theory of Banach spaces
12.30-12.55	<b>J. Starý</b> Coherent structures on Boolean algebras	<b>A. Farhat</b> Hyperspaces as partially ordered sets	<b>D. Vlitas</b> An infinite self dual theorem
13.00-15.00	Lunch break		
	Afternoon session	Afternoon session	
15.00-15.55	<b>P. Tanović</b> Vaught's conjecture for theories with Skolem functions	<b>M. Kurilić</b> Towards a forcing-related classification of relational structures	
16.00-16.25	<b>P. Giordano</b> Ultrafilter sets smaller than their complements	<b>T. Weiertr</b> Asymmetric partition relations between ordinal numbers	Visit to Petrovaradin fortress
16.30-16.55	Coffee break		
	Evening session	Evening session	
16.55-17.20	<b>A. Pavlović</b> Characterization of closed sets in the topology $\mathcal{O}_{\lambda_{ls}}$	<b>B. Kuzeljević</b> Maximal chains of isomorphic subgraphs of the Rado graph	
17.25-17.50	<b>B. Šobot</b> Random graphs and independent families	<b>D. Doder</b> Some recent advances in probability logic	
17.55-18.20	<b>O. Hadžić</b> (Amph. 1) 50 years of Seminar for analysis and foundations of mathematics	<b>M. Boršić</b> On probabilistic inference rules	
18.25-18.50	from 20.00	<b>N. Ikodinović</b> Probability logics and their applications Conference dinner
